

LESSON 10 – FINAL PROJECT PRESENTATION

Machine Learning with Raspberry Pi & Smart Car

The last session – today you present what you built. Share your goal, your code, and a live demo if it runs.

LESSON 10 – FINAL PROJECT PRESENTATION

Today we present!

You built a real robot and real code. Now it's time to share it with the group.

It's your moment

Each of you presents the final project you built.

Be a great audience

While someone presents, stay quiet and respectful.

Cheer each other on

Everyone worked hard to get here – let's celebrate it.

NOT FINISHED?

Need a little more time?

That's okay – just let me know and we'll make room before you present.

LESSON 10 – FINAL PROJECT PRESENTATION

When it's your turn

Walk us through your project – keep it short and just talk us through it.

1 Your goal

What did you set out to build?

2 What you worked on

The parts you put together.

3 Any issues

What was tricky, and how you handled it.

4 How your code works

Walk us through it – and demo it live if you can!

Your turn

Take a breath and talk us through your project. A live demo is a bonus, not a requirement.

LESSON 10 – FINAL PROJECT PRESENTATION

Amazing work!

Across this course you built real robotics and real code. Here's what you can do now.

- ✓ Control LEDs, the buzzer and motors with Python
- ✓ Read sensors – ultrasonic distance and line tracking
- ✓ Stream the camera and track faces in real time
- ✓ Drive the car yourself or let it drive itself

KEEP GOING

This is just the start

Keep building – new sensors, new code, new ideas. You've got the skills now.

COURSE COMPLETE • FINAL SESSION

Thank you for taking the course!

It's been a pleasure teaching you. A few last things before you go.

Final questions?

Now's the time – ask me anything before we finish.

Certificates

Everyone earns a certificate; the top presentations earn Honors. Sent by end of day.

Good luck!

Keep building amazing things – good luck out there.

★ Please leave a review if you enjoyed the course – it really helps!

• COACH ONLY • HIDDEN SLIDE

End-of-course checklist

Don't present this slide. Work through it after the final project presentations.

1 Post the final meeting announcement

Copy the [Final Meeting Announcement](#) Notion template onto the class page; edit as needed.

2 Generate the certificates

After presentations, use scg.aicode101.com – full instructions are on the site.

3 Issue to every student

All students receive a class certificate; pick the top three on presentation quality.

4 Announce the winners

Post to the class page **and** the [#final-project-winners](#) Discord channel – class name, meeting time & winners' names.

CERTIFICATE TIERS

x1 High Honors

x2 Honors

all Regular – everyone else

- ✓ Always post a class announcement
- ✓ Post in Discord #attendance for absent students
- ✓ Introductions if needed
